DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,3-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kadota(5432932) in view of Kadota ("Combination of zno film and quartz to realized large coupling factor and Excellent Temperature Coefficient for the Saw device" IEEE 1997 UltraSonic Symposium).

Kadota substantially discloses the claim invention in fig.1b-16 the however, Kadota (5432932) do not disclose a substrate made of quartz.

Kadota teach (IEEE 1997 Ultra-Sonic Symposium 262-266) a saw device comprising: IDT electrodes and substrate made of quart material for the purpose of obtaining a good temperature coefficient. Therefore, it would have been obvious to one having ordinary skill in the arts at the time the invention was made to modify the saw device of Kadota with the substrate of Kadota (Ultra-Sonic Symposium) for the purpose of miniaturizing the saw device and obtaining a good temperature coefficient.

It also would have been obvious to one having ordinary skill in the art at the time the invention was made to select the range of the PFA at $\pm 2.5^\circ$ since it has been held that where the general conditions of a claim are disclose in the prior art, discovering the

optimum or workable ranges involves only routine skill in the art. IN re Aller, 105 USPQ 233.

Response to Arguments

2. Applicant's arguments with respect to claim 1-14 have been considered but are moot in view of the new ground(s) of rejection.
